

- ion homeostasis
- regulation of system process
- response to wounding
- epithelial cell differentiation
- positive regulation of cellular component movement
- metal ion transport
- regulation of cell projection organization
- regulation of wound healing
- response to inorganic substance
- regulation of ion transport
- response to hormone
- regulation of MAPK cascade
- anion transport
- renal system development
- lipid biosynthetic process
- regulation of cell adhesion
- NABA MATRISOME ASSOCIATED
- positive regulation of hydrolase activity
- Hemostasis
- regulation of membrane potential
